## Structural Technician – Project Coordinator

### Description

Are you the **structural professional** we're looking for?

**AXNOR**, a member of **DPHV Group**, specializes in telecommunication and power transmission infrastructures. Our team offers comprehensive expertise, from engineering services and technical assistance to infrastructure design and construction. Our team's experience and know-how have earned us an excellent reputation in the industry. In other words, we offer the technical agility of a large firm, but the flexibility and humanity of an independent firm! When you join our team, you get the best of both worlds!

Our office is located in **Laval's Sainte-Dorothée district**. Nearby, we have access to restaurants, grocery stores, parks and a protected woodland.

Your **advantages** in joining our team :

- Salary commensurate with your professional experience on an hourly basis – so every hour worked is paid or can be taken as extra time off
- Annual bonus program based on performance and commitment;
- Annual leave, sick leave and hour bank program with no annual maximum;
- Flexible work schedule of 37.5 hours per week to reconcile work and personal life;  
Group insurance program including life, long-term disability, dental, drug, paramedical and travel insurance for you and your family;
- DPSP program – employer-sponsored plan that allocates a portion of company profits to employees through a registered savings plan;
- Teleworking policy with equipment reimbursement program;
- Stimulating work environment;
- Ongoing training program;
- Career development opportunities – coaching and mentoring program;
- Social activities organized throughout the year;
- Free access to beverages and snacks in the office;
- Jeans Friday every day;
- Free on-site and/or nearby parking.

Your **main responsibilities** :

The structural technician – project manager will participate in the **coordination** of projects in collaboration with the engineering team, and will mainly carry out structural inspections and surveys related to foundations and telecommunication and energy transmission structures such as guyed, self-supporting and monopole towers, antennas, rooftop structures and other specialized structures. In addition, the incumbent will also be involved in survey and inspection work related to projects to secure working environments.

- **Project management** with customers and subcontractors
- Participate in start-up meetings and technical coordination with team members
- **Survey**, verify and validate standard structural elements of existing

structures (**at height**).

- Write inspection reports
- Produce 2D or 3D drawings using **Autocad** and/or **REVIT structure**.

Your **qualifications**:

- DEC in civil engineering technology or architecture
- One to 3 years' relevant experience – experience in the consulting engineering field in Quebec will be considered an asset
- Solid knowledge of Autocad drafting software;
- Good knowledge of Revit Structure (an asset)
- Valid ASP-construction card
- Valid driver's license
- Inspection experience (an asset)
- SPRAT I certification (an asset)

Your **profile**:

- Strong interest in structures and field work;
- Intellectual curiosity, desire to learn
- Fluency in French (oral and written)
- Excellent management of time and priorities
- Team spirit, attention to detail and organizational skills
- Excellent knowledge of Excel and interest in improving automated calculation tools

The experience, dynamism and know-how of our team members create an environment conducive to learning, and everyone's contribution enables us to imagine and design concrete, innovative solutions for our customers' various projects. Join our passionate team!

**One partner, one direction...one CAREER!**
